LIP CARE

This highly-pigmented lip balm has a glossy, non-sticky, and pleasantly creamy finish that'll make you forget about your lipsticks. It provides moisture and care, so lips stay soft with gorgeous, buildable color all day long.

**Procedure**

Heat phase A ingredients to 90-95 °C and stir until everything is melted. Add phase B and homogenize. Remove entrapped air and pour into molds at 75-80 °C. If you prefer to use pure pigment split the dispersion to 50 % pure pigment and 50 % castor oil. Add castor oil to phase A. Mix pigments with a part of phase A and grind by using a mill.
